PERSONAL PROJECTS

Croma Clone MERN Stack Project

- **Description:** Developed a full-stack e-commerce platform inspired by Croma using the MERN stack. The application supports user, seller, and admin roles. Users can browse products, add them to the cart, place orders, and view order history. Sellers can manage their products and view sales details, while admins can manage users, products, and orders, and monitor platform-wide activity.
- **Technologies:** MongoDB, Express.js, React.js, Node.js, JavaScript, HTML, CSS.
- **Outcome:** Implemented a functional e-commerce platform with basic-level features such as product browsing, cart management, order placement, and order history viewing, enabling users to experience a simplified online shopping workflow.

CurrentSpotLight React Project

- **Description:** This project is a real-time news application designed to display the latest headlines and articles from various news sources. It pulls data from the News API and displays it in an organized, user-friendly format.
- **Technologies:** React.js, JavaScript, HTML, CSS, News API.
- **Outcome:** Delivered an interactive and user-friendly platform for real-time news updates, enhancing the user's ability to stay informed with relevant content across various categories..
